Built for Premium project supply

A Saudi-based trading and supply partner focused on quality materials, technical understanding and dependable delivery.

About ZAYVON TRADING EST.

ZAYVON TRADING EST. is an established trading and supply company in the Kingdom of Saudi Arabia, providing Civil, MEP, Firefighting and Consumable Materials. Our team of experienced engineers and professionals works to understand each client's technical and project requirements and to provide quality products at competitive prices.

We work with trusted clients to support premium product selection, timely delivery and practical project solutions. Client quality requirements, technical standards and budget considerations remain central to our supply approach.

Our objective: build long-term customer relationships through quality materials, premium service and value for money.

QUALITY PRODUCTS

Premium Supply. Competitive Value.

Vision & Mission

A clear focus on trust, quality, engineering understanding and long-term value.

VISION

To become a trusted and preferred trading partner in Saudi Arabia, known for quality products, engineering expertise, competitive value and long-term customer relationships.

MISSION

To provide quality Civil, MEP, Firefighting and Consumable materials with premium service, competitive pricing and timely delivery, while meeting clients' technical and project requirements.

Our Supply Portfolio

A focused range for building, infrastructure, MEP, maintenance and site requirements.

1

CIVIL MATERIALS

Civil and construction materials for building and infrastructure projects, including steel items, supports, mesh, plates and related accessories.

PROJECT-ORIENTED SUPPLY

2

MEP & FIREFIGHTING

Mechanical, electrical, plumbing, HVAC, firefighting and fire-protection materials, equipment, fittings, valves and accessories.

PROJECT-ORIENTED SUPPLY

3

CONSUMABLE MATERIALS

General consumables, safety products, tools, hardware, fasteners, supports, tapes, adhesives and maintenance materials for site needs.

PROJECT-ORIENTED SUPPLY

Steel, Angles & Cable Support

Structural and support items for civil and MEP installation requirements.

Our civil supply range includes steel, stainless-steel and support items used across construction, infrastructure and building-services installations.

Angles & Plates

Steel support items for anchoring, framing, brackets and site fabrication requirements.

Angles

Preformed angle pieces used in connection, support and fixing applications.

Cable Tray

Perforated tray sections for organised routing and support of electrical cabling.

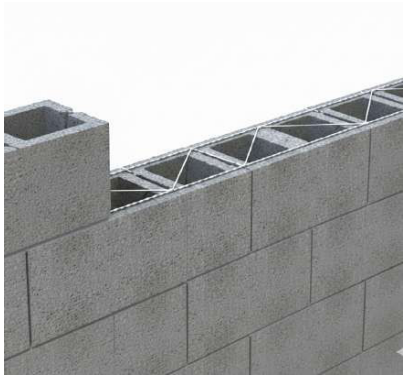

Steel / Stainless Items

Fabricated steel and stainless-steel pieces for project-specific support and fixing needs.

Mesh, Grating & Ties

Reinforcement and restraint components for masonry, support and access applications.

ZAYVON supplies mesh, grating and tie products for project requirements where reinforcement, restraint, drainage or secure connection is needed

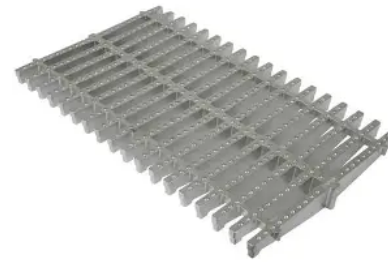

Ladder Meshes

Masonry reinforcement mesh used to strengthen horizontal joints and improve wall integrity.

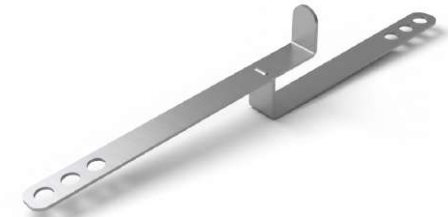

Wire Meshes

Welded mesh supplied for reinforcement, screening, protection and general project use.

Grating Channels

Metal grating elements for drainage, access, ventilation and industrial floor applications.

Ties

Metal ties and connectors for restraint, anchoring and secure attachment between components.

Structural Supports & Connections

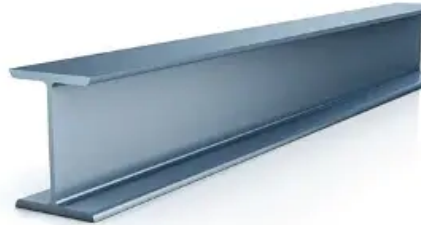

Support components for framing, restraint and load-transfer applications.

The structural support range covers restraint brackets, beams and connection plates required for robust, coordinated project installations.

Overhead Restraints

Metal restraint brackets for overhead and support installations.

H-Beam

Structural steel beam sections for load-bearing and support applications.

Connecting Plates

Perforated steel connection plates for bolted structural and support assemblies.

Base Plates

Steel base plates for columns, supports and anchored structural connections.

Structural Supports & Connections

Support components for framing, restraint and load-transfer applications.

The structural support range covers Dowel Bars required for robust, coordinated project installations.

Plain Steel Dowel Bars

Smooth round steel bars for standard concrete pavement joints.

Epoxy Coated Dowel Bars

Corrosion-protected dowels suitable for roads, highways and demanding environments.

Stainless Steel Dowel Bars

High-corrosion-resistance option for marine, coastal and critical infrastructure projects.(SS316/SS304).

Galvanized Dowel Bars

HDG/Zinc-coated dowels providing additional corrosion resistance.

Valves & Flow Control

Core valve types for isolation, regulation and hydronic system control.

Our mechanical supply portfolio includes commonly specified valve types for plumbing, HVAC and other building-services piping requirements.

Ball Valve

Quarter-turn isolation valve used for fast shut-off in piping systems.

Gate Valve

Isolation valve designed for fully open or fully closed service in pipelines.

Butterfly Valve

Compact quarter-turn valve suitable for isolation and flow control in larger pipe sizes.

PICV

Pressure independent control valve for controlled hydronic flow and balancing applications.

Expansion Joints & Flexible Connectors

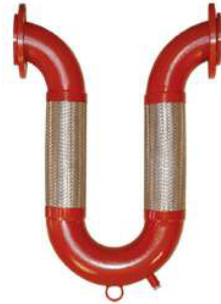

Components that help accommodate movement, vibration and pipe-system flexibility.

Flexible connectors and expansion joints are used where piping systems need movement allowance, vibration isolation or connection flexibility.

Stainless Steel Expansion Joint

Stainless steel bellows connector for thermal movement and vibration accommodation in piping systems.

FM Standard Expansion Joint

Expansion-joint configuration listed in the original ZAYVON supply catalogue for fire / MEP applications.

Rubber Flexible Connector

Elastomeric connector used to reduce vibration transmission and accommodate minor movement.

Flexible Metal Connector

Flexible metal expansion component for movement and stress relief in connected piping.

Air Distribution & Noise Control

HVAC components for air delivery, air regulation and system noise management.

ZAYVON supplies HVAC air-distribution and acoustic-control components for coordinated mechanical installations and indoor-environment requirements.

Air Outlets

Ceiling and wall air outlets for distributing conditioned air into occupied spaces.

Dampers

Air-control devices used to regulate or isolate airflow within duct systems.

Louvers

Architectural and mechanical louver products for air intake, exhaust and ventilation openings.

Sound Attenuators

Duct-mounted acoustic components designed to reduce transmitted HVAC system noise.

Acoustic Materials & Treatments

Material options for architectural and building-services sound control.

Our acoustic range supports projects that require improved sound absorption, reduced reverberation and better acoustic comfort.

Acoustic Panels

Panel systems used to improve sound absorption and reduce room reverberation.

Acoustic Plasters

Acoustic finish systems combining architectural appearance with sound-absorbing performance.

Acoustic Solutions

Layered acoustic materials selected to support project-specific sound-control requirements.

Acoustic Spray

Spray-applied acoustic treatment for exposed surfaces and sound-absorption applications.

Copper Pipes & Fittings

A focused copper range for building-services piping and connection requirements.

The catalogue includes copper pipes, copper coils and a wide selection of fittings for plumbing, HVAC and related mechanical-service applications.

Copper Pipes

Straight copper tube products for mechanical and plumbing piping systems.

Copper Coils

Coiled copper tubing for flexible routing and service installation requirements.

Copper Fittings

Elbows, tees, reducers and related fittings for joining and routing copper pipework.

Fasteners, Supports & Site Consumables

Everyday project items that support installation, fixing, maintenance and finishing activities.

ZAYVON offers general consumables, tools, hardware and maintenance materials, including the fastening and support items shown below.

Fasteners

Nuts, bolts, screws, washers and related hardware for assembly and fixing applications.

Supports

Pipe and service support components for organised, secure MEP installations.

Tapes

General-purpose and project tapes for installation, protection and maintenance tasks.

Adhesives

Construction and maintenance adhesives for bonding, sealing and site-use requirements.

Project Supply Beyond the Catalogue

A broader supply capability for mechanical, electrical, plumbing, HVAC, firefighting and fire-protection requirements.

SUPPLY SCOPE

- Mechanical, electrical and plumbing materials for coordinated building-services packages.
- HVAC equipment, fittings, valves and accessories for project installation requirements.
- Firefighting and fire-protection materials, equipment, fittings, valves and accessories.
- General consumables, safety products, tools, hardware and maintenance materials for project and site needs.

Product selection is aligned with client requirements, technical standards and budget considerations.

Engineering Services

Technical support services listed in the ZAYVON company profile.

- **Acoustic Studies & Technical Reports**

Documentation and technical study support for project acoustic requirements.

- **Pipe Stress Analysis**

Engineering analysis support for piping movement, loading and system behaviour.

- **Hanger Load Calculations**

Load calculation support for hanger and support coordination.

TECHNICAL VALUE

Engineering support complements material supply by helping clients coordinate technical requirements and project decisions with greater clarity.

Why Work With ZAYVON

A supply approach built around project understanding, responsiveness and long-term customer value.

01 Technical Understanding

Experienced engineers and professionals help interpret project and technical requirements.

02 Trusted Supply Network

The company works with trusted suppliers to support premium material sourcing and supply.

03 Competitive Value

Product selection considers quality requirements, technical standards and customer budgets.

04 Timely Delivery Focus

Premium service and timely delivery are core elements of the company's stated mission.

05 Broad Project Coverage

Civil, MEP, Firefighting and Consumable categories support diverse site and project needs.

06 Long-Term Relationships

The company aims to build lasting customer relationships through quality, service and value for money.

LET'S WORK TOGETHER

We look forward to supporting your next project with quality materials, premium supply and competitive value.
